In-closed are pictures showing the cleanup work at the Bromide basin mines. The photos attached on the left hand side were during DOGMS site inspection the photos on the right hand side were taken by Unico's personal while the cleanup was underway. Additional photos are available if needed

We have organized the scrap iron and miscellaneous usable items located at the cabin and at the lower Henrietta mill site that can be used for any future mining.

If you have any questions please feel free to call. We feel that there should be no reason on Kaibab's part for the transfer of operator not to take place. This property has now been left in better condition then it was prior to Unico tenure.

Best Regards

Charles J. Madsen
